Media Sponsored by

GREEN CRESCENT 4TH INTERNATIONAL CONGRESS OF TECHNOLOGY ADDICTION

MAIN OBJECTIVE

It is obvious that rapidly expanding new generation devices bring unexpected repercussions. Particularly, studies conducted in developed countries prove that technology addiction rate is threatening young generation and public health and therefore resulting in serious social and individual problems. It is observed that there is a lack of awareness in conscious use of technology despite rapid development of technology and communication devices.

The Congress that will be held under the leadership of Turkish Green Crescent Society in collaboration with Culture Society and Family Association (KULT) is expected to contribute to raising of new generations aware of conscious use of technology.
